INDUSTRIAL SHREDDER

And Cutter Company

707 SOUTH ELLSWORTH AVE.

SALEM, OHIO

THERE IS AN "INDUSTRIAL" SHREDDER TO HANDLE ALMOST ANY KIND OF PAPER, TOBACCO, GASKETING MATERIALS, METAL FOILS, MOST PLASTICS

One of these "INDUSTRIAL" Shredders can save you money, reduce fire hazards and eliminate cost and confusion of manual disposal of confidential records, excess paper or waste. There are two types of "INDUSTRIAL" Shredders:

SLITTERS . . . slit paper lengthwise into uniform 1/4" wide continuous strips with knives that require no sharpening. Two sizes are available, the "AUTO-SHRED" and the "SILVER SUPER", both designed for business offices, banks, record centers and similar locations. Slitter type shredders are very quiet, and require no maintenance or adjustment.

REEL type machines are relatively less expensive to buy and require less labor per ton of output. They have tremendous capacity, width of shreds can be changed, knives can be readily resharpened. Occasional uneven shreds may be delivered. This type of machine can be built in very large sizes and can be designed to shred any kind of paper or similar material in almost any form.

ALL "INDUSTRIAL" SHREDDERS ARE GUARANTEED FOR ONE FULL YEAR

THE AUTO-SHRED

AUTOMATIC FEED, NEW FIBER-GLASS CASE . . . makes any office a modern office! The only Automatic office shredder on the market now appears in a beautiful new fiberglass case of modern design, completely re-engineered throughout, including a convenient access window to allow visual inspection during operation. Permits positive, efficient destruction of old checks, vouchers, time cards, ledger sheets, tickets, coupons and similar papers.

The AUTO-SHRED is quiet, safe, and so easy to use that anyone in the office can operate it. It accepts papers up to 10" wide of almost any kind found in an office. Paper clips, staples and pins cause no damage to AUTO-SHRED. Just feed your confidential or waste material into the hopper and it will be immediately slit into narrow, unreadable strips, ready for disposal.

Try this machine in your own office on our no obligation 10 day trial plan.

SILVER SUPER

. . . production model slitter accepts up to 1000 pounds of newsprint per hour or proportionate amount of other types of paper. The "SILVER SUPER" is especially designed for offices, banks, and record centers, where large volumes of confidential material must be destroyed.

The "SILVER SUPER" is furnished with a flat feed table which will accept papers 20" wide by any length and slit them lengthwise into uniform 1/4" shreds. Pins, staples, and paper clips have no effect on the tempered steel slitting discs.

Motor reversing switch can instantly clear the machine in the event of overloading. The "SILVER SUPER" requires virtually no maintenance beyond lubrication once or twice a year. It is built of heavy duty materials throughout, and requires no special training to operate.

ASK ABOUT OUR SPECIAL NO-OBLIGATION 20-DAY TRIAL PLAN

"INDUSTRIAL" SHREDDER STANDARDS									
MODEL	(1) Capacity (Lb./Hr.)	Dimensions			Type of Feed & Width of Throat	Type of Cut Width of Shred	Motor	Weight (lbs.)	
		Width	Length	Height				Net	Shipping
"Auto-Shred"	50	19"	21½"	18"	Automatic Hopper & Manual 10"	Slitter ¼"	½ HP, 115 volt 60 cycle single phase	70	80
Model 13-D	400	25"	(2) 43½"	18½"	Manual 12½"	Reel 3/32" 3/16" ½"	1 HP, 115 volt 60 cycle, single phase OR 220/440 volt 60 cycle, 3 phase	245	300
Silver Super	600- 1000	34"	(3) 42"	39"	Manual 20"	Slitter ¼"	2 HP 220/440 volt 60 cycle 3 phase	650	775
Model 16	2000	34"	60"	46"	Conveyor 15½"	Reel ⅛", ¼", ½"	3 HP 220/440 volt 60 cycle 3 phase	625	735
Model 16-B	800- 1500 Crumpled paper and small cartons	34"	60"	46"	Conveyor with Compression Roll 15½"	Reel ⅛", ¼", ½"	3 HP 220/440 volt 60 cycle 3 phase	665	775
Model 20	4000	42"	80"	45"	Conveyor 19½"	Reel ⅛", ¼", ½"	10 HP 220/440 volt 60 cycle 3 phase	1300	1500

(1) Capacity based on shreds of medium width.

(2) Model 13-D is 28 1/2" long with feed table retracted.

(3) Silver Super is 29" long with feed table retracted.

All machines are supplied with reversing switches and can be furnished with special motors or without motors.

ND OF MATERIAL—ANY KIND OF PAPER, CORRUGATED, LEATHER, STICS, . . . EVEN BOXES, CARTONS AND BULKY MATERIALS

MODEL 13D ▲

. . . engineered to produce paper excelsior packing material from newsprint, OR for extremely high volume requirements of confidential record destruction. The "13D" can make excelsior packing for about $\frac{1}{4}$ the cost of purchased packing. It will accept any kind of paper, including corrugated cardboard. Even the smallest user of excelsior will save money with the "13D", and will increase working space in the packing department.

Takes less time to shred your own paper than to break and fluff up those expensive bales of packing material which are taking up needed space.

Width of shred can be adjusted to $\frac{3}{32}$ ", $\frac{3}{16}$ ", or $\frac{1}{2}$ " wide. Cutting knives can be resharpened and replaced after long use.

USE THIS MACHINE ON YOUR PREMISES FOR 10 DAYS TO PROVE ITS VALUE TO YOURSELF. ASK ABOUT TRIAL PLAN — NO OBLIGATION

MODELS 20 and 20B ▶

For commercial work, special applications and tough jobs, the "20" and "20-B" are recommended for continuous duty with any kind of paper, corrugated, leather, tobacco, soap boxes, metal and plastic foils. Send a sample of your material. We'll shred it free and return it with our recommendations.

The "20-B" features a compression feed roller which automatically flattens small boxes, cartons, and crumpled materials. Additional information on this model is available on request.

The 10 hp drive motor provides more than enough power and capacity for all normal operations.

MODELS 16 and 16B ▲

Designed for volume production of shredded paper, the "16" features maintenance free operation, requires minimum labor, and will accept any type of paper from tissue to extra-heavy corrugated. Its capacity is over one ton of newsprint per hour. Since 1946 the "16" has been the standard of large users, as well as producers of shredded paper.

The "16-B" is a modified machine with a compression roll mounted above the conveyor to allow direct feeding of crumpled or wadded paper, cups, small boxes and similar bulky materials. This model is ideal for destroying paper from wastebaskets. The "16-B" is the smallest crusher-shredder available. For more detailed data on the "16-B", a separate bulletin is available.

OFFERED ON 20 DAY FREE TRIAL PLAN

INDUSTRIAL DUTY MACHINES AND SYSTEMS

MODELS 40A and 60A

Powerful, rubber conveyor belts each individually motor driven, crush bulky paper material or cartons for shredding into $\frac{1}{4}$ " shreds (or wider) easily air conveyed and baled. Makes well knit bales. Unsurpassed for keeping plant floor clear of waste. Eliminates hand flattening of bulky boxes. When used with blower systems it saves many man hours of labor. The Model 60A embodies the same principles as the Model 40A but feed opening is 17" wider and 12" higher to accommodate larger boxes.

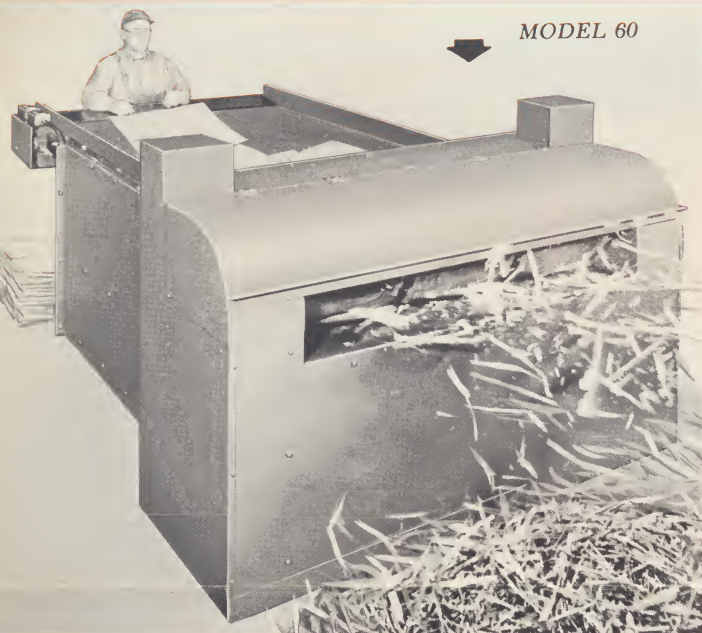

These machines achieve a high degree of efficiency with comparatively low horsepower because of the sharp cutting edge of their spiral knives. All motors are within the machine. Full safety protected.

MODEL 40A

MODELS 40 and 60

For paper converters, boxboard plants and industries where the material to be shredded is flat the Model 40 or the larger Model 60 can be used at a considerable saving in initial cost compared to the crusher machines above. These machines have the same powerful cutting action, low maintenance cost and freedom from down time. Used by large manufacturing companies, scrap yards, federal and state governments and throughout industry.

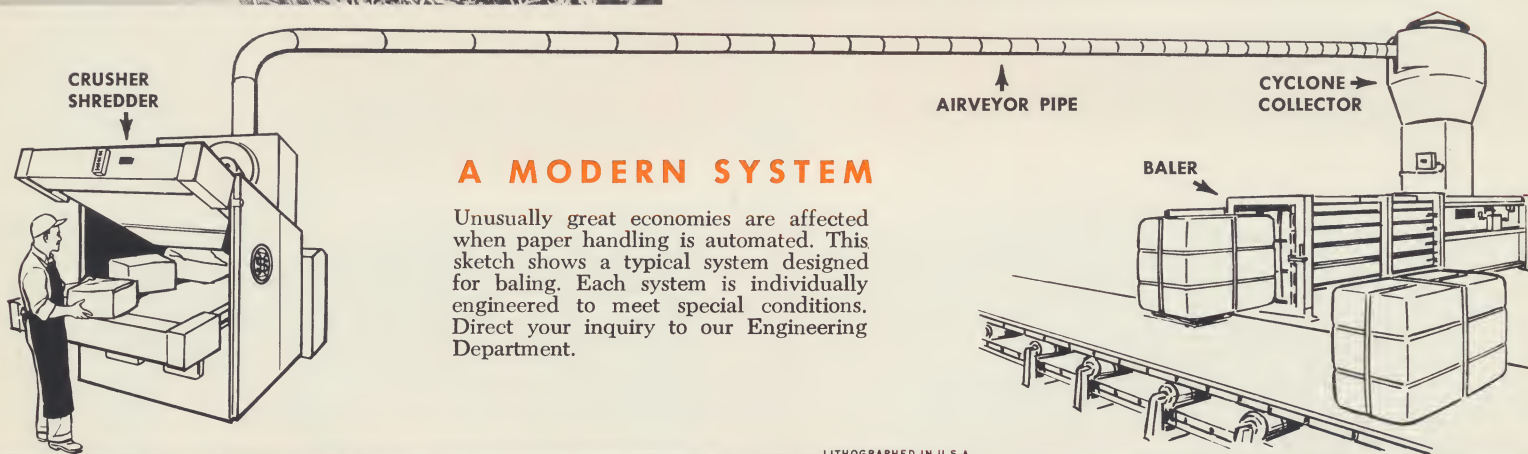

MODEL 60

"INDUSTRIAL" SHREDDER STANDARDS

MODEL	CAPACITY Tons Per Hour			DIMENSIONS				Type of Feed	Motor	Weight (lbs.)	
	Flat Paper	Flat Corrugated	Cartons and Crushed Paper	Width	Length	Height	Maximum Feed Opening			Net	Shipping
40-A	3 tons	2 tons	$\frac{3}{4}$ ton	56"	97"	70"	39" x 24"	Crusher Conveyor Two $\frac{3}{4}$ HP Motors	15 HP	3700	4000
60A	4 tons	3 tons	1 ton	76"	122"	82"	56" x 36"	Crusher Conveyor Two 1 HP Motors	20 HP	5000	5500
40	3 tons	2 tons	..	59 $\frac{1}{2}$ "	99"	49"	39" x 2"	Separately Powered Conveyor $\frac{1}{2}$ HP Motor	15 HP	2800	3000
60	4 tons	3 tons	..	79 $\frac{1}{2}$ "	124"	50"	57" x 3"	Separately Powered Conveyor $\frac{3}{4}$ HP Motor	20 HP	4000	4300

Standard width of shred is $\frac{1}{4}$ " but machines can be ordered for any one width from $\frac{1}{8}$ " to 1". The wider the shred the greater the production. Motors are 220/440 volt, 3 phase, 60 cycle. Machines are shipped completely wired with starter and push button control. Can be furnished with special motors or without motors.

A MODERN SYSTEM

Unusually great economies are affected when paper handling is automated. This sketch shows a typical system designed for baling. Each system is individually engineered to meet special conditions. Direct your inquiry to our Engineering Department.

PRICE LIST

INDUSTRIAL SHREDDER & CUTTER CO.

SALEM, OHIO

"SLITTER" TYPE SHREDDERS for flat material

"SECURITY 1" PAPER SHREDDER, shipping weight 61 lbs. Complete with 1/3 HP, 115 volt, 60 cycle, single phase, A.C., reversible motor, switch, cord and grounded plug. Blue leatherette dustproof cover. Makes 1/4" shreds.	\$ 260.00
Steel stand containing large waste bin, mounted on casters.	50.00
"AUTO-SHRED" PAPER SHREDDER, shipping weight 80 lbs. Complete with 1/3 HP, 115 volt, 60 cycle, single phase, A.C., reversible motor, switch, cord and grounded plug. Automatic Feed Hopper. Blue Leatherette dustproof cover. Makes 1/4" shreds	345.00
Steel stand containing large waste bin, mounted on casters.	72.50
"SILVER SUPER" PAPER SHREDDER, shipping weight 775 lbs. Complete with 2 HP, 220 or 440 volt 3 phase, 60 cycle, reversible motor and switch. Makes 1/4" shreds	1395.00

"REEL" TYPE SHREDDERS for flat material

"MODEL 13D" PAPER SHREDDER, shipping weight 300 lbs. Complete with 1 HP, reversible motor, switch. Cord and plug for single phase motors. Adjustable for 3/32", 3/16" and 1/2" shreds. Supplied with 115 volt, single phase; or 220/440 volt, 3 phase, 60 cycle motor	585.00
Discharge Chute to direct shredded paper down into your container.	35.00
Steel stand on casters	58.50
"MODEL 16" PAPER SHREDDER, shipping weight 735 lbs. Complete with 3 HP, 220 or 440 volt 3 phase, 60 cycle reversible motor and switch. Adjustable for 1/8", 1/4" and 1/2" shreds.	1295.00
"MODEL 20" PAPER SHREDDER, complete with 10 HP, 220 or 440 volt, 3 phase, 60 cycle reversible motor and switch. Adjustable for 1/8", 1/4" and 1/2" shreds.	\$1985.00
"MODEL 40" PAPER SHREDDER for shredding paper, corrugated and other flat material, with rubber conveyor belt, 15 HP, 3 phase, 220/440 volt motor and starter.	3950.00
"MODEL 60" PAPER SHREDDER for shredding paper, corrugated and other flat material, with rubber conveyor belt, 20 HP, 3 phase, 220/440 volt motor and starter.	5500.00

CRUSHER - SHREDDERS for cartons and bulky material

"MODEL 16B" SHREDDER for shredding light cartons, crumpled and flat papers, with 3 HP, 220 or 440 volt, 3 phase, 60 cycle reversible motor and switch. Direct drive compression roll.	1425.00
"MODEL 20B" SHREDDER for shredding light cartons, crumpled and flat papers, with 10 HP, 220 or 440 volt, 3 phase, 60 cycle reversible motor and switch. Direct drive compression roll	2235.00
"MODEL 40-A" CRUSHER-SHREDDER. Knives driven by 15 HP, 220/440 volt, 3 phase 60 cycle reversible motor and starter. Two 3/4 HP gearhead motors on crusher belts. Feed opening 39" x 24"	5300.00
"MODEL 60-A" CRUSHER-SHREDDER. Knives driven by 20 HP, 220/440 volt, 3 phase, 60 cycle reversible motor and starter. Two 1 HP gearhead motors on the crushing belts. Feed opening 56" x 36"	6950.00

Attention: V. Nelson

Dear Mr. Nelson:

THE OFFICE Magazine has advised us of your inquiry referring to our "Auto-Shred" paper shredder. We are pleased to enclose literature and prices on this model as well as our complete line, and are requesting our representative, Mr. Myrton Pearlswig, to call on you as soon as possible.

The "Auto-Shred" was designed to fill the need for a small, quiet operating shredder to destroy confidential correspondence, cancelled checks, etc., in the privacy of your office. All kinds of paper up to card stock, including paper clips and staples are shredded into unreadable 1/4" strips. It features an automatic feed hopper, eliminating constant hand feeding.

The "Auto-Shred" can be operated on any table or desk, or we can supply a special stand on casters, with aluminum bin to catch the shreds.

The new "Security 1, Electric Waste Basket" is designed on the same general principles as our "Auto-Shred" which has proven so successful over the past 10 years. The major differences are that the "Security 1" is (1) smaller in overall size and weight but with the same capacity; (2) is considerably lower in cost; and (3) the feeding is entirely manual.

Shipment can be made promptly from stock on a 10 day trial basis with your only expense or obligation being the freight charges. The larger models can also be shipped on trial.

Should you have any questions, Mr. Nelson, please ask them freely or contact Mr. Pearlswig. Our experience with all phases of shredding is yours for the asking, and we hope to have the privilege of sending you a shredder on a trial basis in the near future.

Yours truly,

INDUSTRIAL SHREDDER & CUTTER CO.
